

1. Given the information below, draw grant charts for the algorithms. Also calculate average waiting time and average turnaround time for each algorithm. (12 pts)

Process	Arrival Time	Burst Time
P1	0.0	6
P2	2.0	3
P3	3.0	1
P4	4.0	4
P5	6.0	2

$$0 + 4 + 5 + 6 + 8$$

- a. FCFS (non-preemptive)

Average waiting time 4.8 Average Turnaround time 8

- b. SFJ (preemptive)

Average waiting time 3 Average Turnaround time 6.2

- c. RR (quantum = 1)

Average waiting time 5.6 Average Turnaround time 8.8

- d. Which algorithm has

- Smallest average waiting time SFJ
- Largest average waiting time RR
- Smallest average turnaround time SFJ
- Largest average turnaround time RR

$$15 + 8 + 3 + 12 + 6$$
